

Practical 10:

Ask ChatGPT OR Google Gemini to generate a 100–120 word paragraph on:

“Is online learning better than offline learning for college students?”

- a) Run the AI-generated text through Grammarly and any plagiarism-check tool.
- b) Now manually search online to check if similar sentences exist on blogs or articles.
- c) Identify 2–3 biased statements in the AI answer, such as:
 - i. Over-generalizations
 - ii. One-sided opinions
 - iii. Unproven claims
- d) Rewrite the entire paragraph in a neutral and balanced way, using AI only for grammar suggestions.
- e) Submit 3 screenshots:
 - i. Plagiarism check result
 - ii. Grammarly suggestion page
 - iii. Original AI paragraph vs your rewritten unbiased version

Answer:

The screenshot displays a plagiarism checker interface. At the top, there are tabs for 'Plagiarism Checker', 'Check Grammar', and 'AI Detector', with a 'Pro' badge on the right. The 'Plagiarism Checker' tab is active. On the left, under 'Scan Properties', it shows 'Sources Found: 0', 'Words: 93', and 'Characters: 658', with a 'View More Details' button. The main area shows three circular progress indicators: 'Plagiarism 0%', '0% Exact Match', and '0% Partial Match'. To the right, a green circular indicator shows 'Unique 100%'. Below this, a text box contains a paragraph about online learning. To the right of the text box is an illustration of a person sitting at a desk with a laptop, looking at a screen with checkmarks. A blue chat bubble icon is in the bottom right corner.

Online learning is far better than offline learning for college students because it provides unmatched flexibility and convenience. Students can attend classes from anywhere, saving time and money on travel. Online platforms also offer recorded lectures, interactive tools, and global resources that traditional classrooms cannot compete with. Offline learning, on the other hand, often feels outdated and less efficient compared to the dynamic nature of digital education. For today's generation, online learning is clearly the superior choice, preparing students more effectively for modern careers and ensuring they stay ahead in a technology-driven world

Online learning is far better than offline learning for college students because it provides unmatched flexibility and convenience. Students can attend classes from anywhere, saving time and money on travel. Online platforms also offer recorded lectures, interactive tools, and global resources that traditional classrooms cannot compete with. Offline learning, on the other hand, often feels outdated and less efficient compared to the dynamic nature of digital education. For today's generation, online learning is clearly the superior choice, preparing students more effectively for modern careers and ensuring they stay ahead in a technology-driven world.	Online and offline learning both have unique strengths for college students. Online platforms provide flexibility, recorded lectures, and access to diverse resources, which can help students balance academics with other responsibilities. They also reduce costs related to travel and accommodation. However, offline learning offers face-to-face interaction, immediate feedback, and a structured environment that many students find motivating. While online methods are convenient and technology-driven, offline classrooms foster social connections and collaborative learning. Rather than one being superior, both approaches can complement each other, and the effectiveness often depends on the student's learning style, discipline, and academic goals.
